

AHFrancis Foaming Lash Wash Usage Instructions

In the salon

- Ask your client to arrive at their appointment without eye makeup as this not only gives you a good base to start with, it also means that you are not fighting with waterproof mascara
- Pump a small amount on to the back of your hand and with the client's eyes closed, use a foam lip gloss applicator or a lint free pad to apply the lash wash to the lashes. Gently sweep down the lashes, so that you are pushing any dirt away from the lash line removing any oil or bacteria from the lashes
- We would recommend using a protein pad to remove any excess and to give a further cleanse and to ensure any moisture has been removed before you carry out a full lash application or infills
- Blot dry the lashes with a clean, dry tissue

Client aftercare

Clients can use the lash wash as part of their regular aftercare regime and we would recommend using it every three days or so.

The instructions for use are the same as above, however there is no need to use a protein pad, as these are for salon use only.
